THE ANNALS INDEX VOLUME 27

Margaret Byrne Swain
University of California, Davis, USA

Conventional wisdom cautions against adding new index headwords and Subheadwords, especially just after compilation of the 25th year comprehensive index of *Annals*. However, as the field of tourism studies changes, so do subjects published in this journal. Eleven new headwords have been added, including begging, European Union, industrial tourism, stakeholders, thanatourism, transitional economy, and violence; three geographic locations of Belgium, Denmark, and Eritrea; and one cross-reference to dark tourism, thanatourism. The eight subheadwords added include geographic reference, Europe, Southern, and the following subjects: attraction, death as; conference/congress/seminar, cultural tourism; ethnic, minorities; industry, history; market, research; methodology, analytical, path; and political, economy.
